

DisplayView and DisplayView Pro

Be Everywhere at Once

DisplayView device management software is a simple and efficient way to monitor and control InFocus panels and projectors across your organization. Upgrade to DisplayView Pro* to send messages and alerts; install and uninstall apps, files and documents; and change Display Settings like network, security, and more.

Key Features

- Save money by managing power settings and usage from one location
- Auto-discover devices connected to local network
- Organize your devices in groups (each device can be in multiple groups)
- Schedule multiple automated tasks by group
- Receive messages if devices are disconnected from the network
- Devices without network management can be converted using network adapter (INA-TCP232)
- Standard version available as a free download from InFocus.com

DisplayView gives you detailed analytics of your entire deployment from the convenience of a central location

DisplayView works with any InFocus panel or projector released since 2016.

Upgrade to DisplayView Pro*

- Send messages and alerts
- Install and uninstall apps, files and documents
- Change Display Settings like network, security, and more

View up to date usage analytics filtered by group or for each individual display

Manually send commands

Get real-time status messages

The screenshot shows the DisplayView software interface with several sections:

- Power:** On, Off, Get Status buttons.
- Source:** HDMI1-4, HDMI, AV, VGA, Comp, OPS, Android, Rtn to Src buttons.
- Status:** Powered On: 10, Powered Off: 0, No Response: 2. A message says "One or more devices were non-responsive. Please try again." and a "Ready" indicator is at the bottom.
- Analytics:** A bar chart titled "Hours Used by Day (Avg)" showing usage for Admin Building (blue), Sci Building (orange), and All (red) from Sunday to Saturday.
- Scheduler:** A table for scheduling tasks by day, time, and group.

Day	Time	Task	Group
<input checked="" type="checkbox"/> Friday	05:00 PM	Pwr Off	Sci Bldg
<input checked="" type="checkbox"/> Monday	07:30 AM	Pwr On	Sci Bldg
<input type="checkbox"/> Monday	08:00 AM	Pwr On	My Network
- Discovered Devices:** A tree view showing "My Network" with sub-groups like "Admin Building" (Room 121-254, Main Office, Library, Auditorium) and "Sci Building" (Room 10-12, Lab 1-2). An "Unassigned Devices" section is also present.

Get automatic notification of "missing" devices (indicated in orange)

See list of discovered devices; rename devices and organize by group

Schedule tasks by day, time, and group

Specifications*

Hardware Requirements	InFocus display device (projector or touch panel) with LAN port supporting Network Management. Units without Network Management will need a Network-to-RS232 adapter (INA-TCP232) to connect to the RS.232 port.
Software Requirements	Operating System: Windows 7/8/10 with Admin Access
Disk Space	Minimum 100MB
Memory	Minimum 2Ghz
Processor	i5 or better
Network Requirements	Network Interface Card and access to TCP/IP Network, Port Unrestricted (8234)

DisplayView Part #	
INDISPLAYVIEW	Available as a free download on InFocus.com

DisplayView Pro License Part #s	
INS-MDM - 1 YR	Per Panel license for one year
INS-MDM - 2 YR	Per Panel license for two years
INS-MDM - 3 YR	Per Panel license for three years
INS-MDM - 5 YR	Per Panel license for five years
