

## How to bring up the System Recovery Options on Mondopad

### SITUATION:

You have problems with Windows or a software application corrupted the windows install.

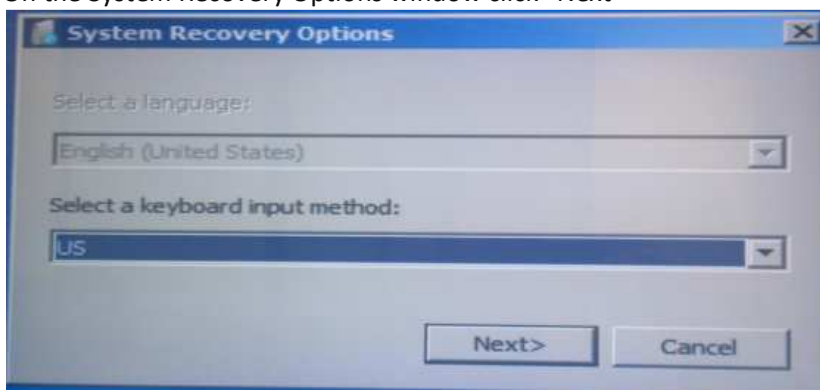

### SOLUTION:

Using the procedure below you can bring up the System Recovery Options.

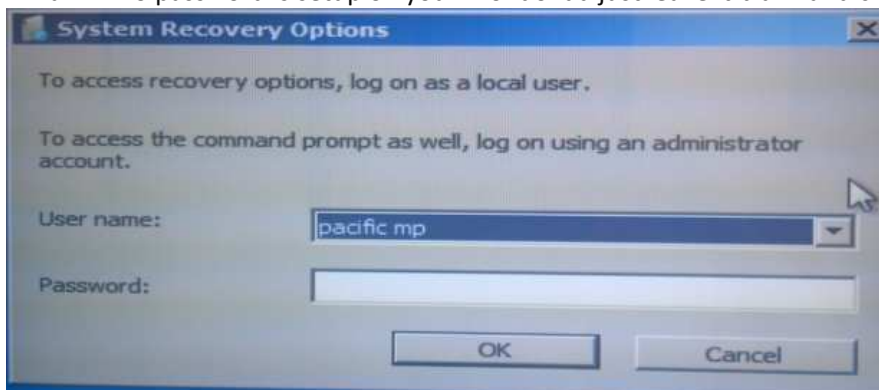

1. Exit the MondoPad Shell
  - a. Go to the Extras tab
  - b. Click on Admin
  - c. Enter your admin code
  - d. Choose "Exit MondoPad"
  - e. Click "Yes" to confirm exit
2. Go to the Windows menu and choose to restart Windows.
3. As soon as Windows disappears from the screen **start tapping the F10 key on the keyboard twice a second.**

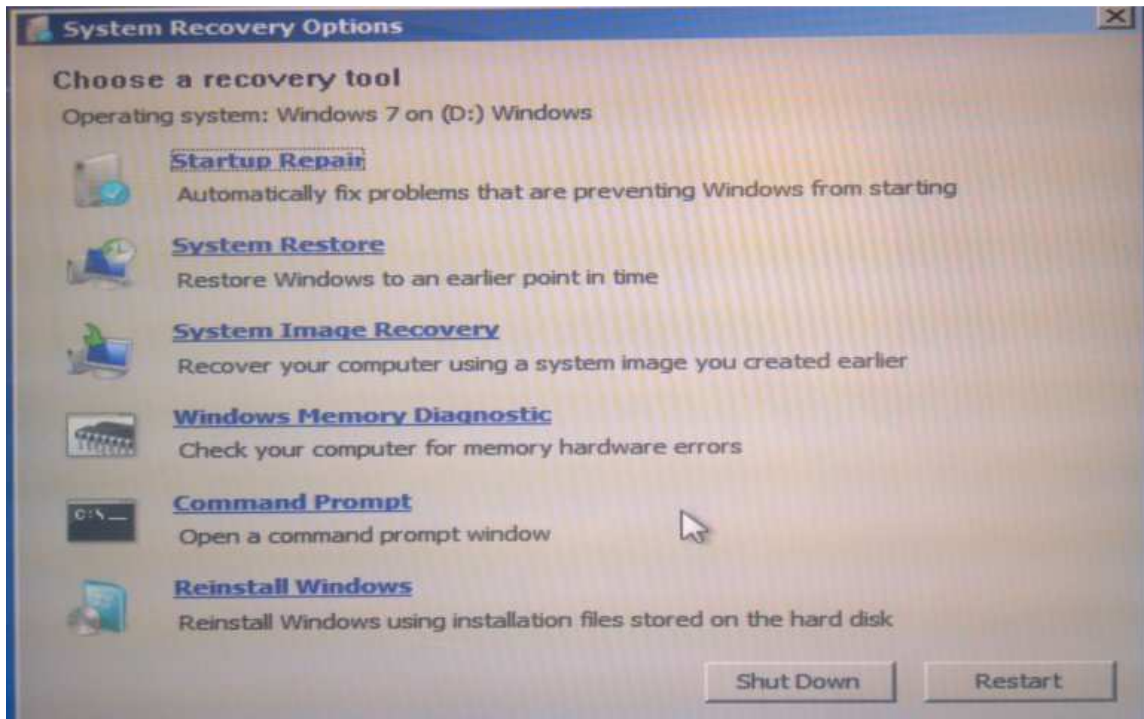

*If you are having difficulty getting the System Recovery Options to appear....*

- a. *If the MondoPad boots back into windows, try the process again and tap the F10 key faster.*
  - b. *Sometimes wired USB keyboards work better for this then wireless. Try switching to a wired USB keyboard.*
4. On the System Recovery Options window click "Next"

5. Choose your Windows username and enter password, click "OK"
  - a. If no password is setup on your MondoPad just leave it blank and click "OK"

You will now be at the System Recovery Options. Here are the 6 options that will be available.

**Startup Repair**

Automatically fix problems that are preventing Windows from starting

**System Restore**

Restore Windows to an earlier point in time

**System Image Recovery**

Recover your computer using a system image you created earlier

**Windows memory Diagnostic**

Check your computer for memory hardware errors

**Command prompt**

Open a command prompt window

**Reinstall Windows**

Reinstall Windows using installation files stored on the hard disk **!!Warning!!! Using this option will reset your MondoPad to an out of box state. All data, programs, updates and settings will be erased.**

For more detailed information on how to use the System Recovery Options please see the Microsoft Knowledge base article below:
